

AsbestaPLAN^{Plus} has been specifically designed to assist duty holders, property managers, surveyors and consultants to comply with the requirements of the **Control of Asbestos at Work Regulations 2002**, this is achieved by:

- **Handheld Pocket PC Survey Software** and a desktop asbestos management database that provides a complete solution for the management, documentation and surveying of Asbestos Containing Materials (ACM's)
- The provision of a comprehensive **Asbestos Survey Report** template in MS Word format
- An electronic system for assisting with the identification and **management of risk** from ACM's
- An automated system for carrying out a suitable and sufficient **risk assessment** of both real and suspected ACM's as required by MDHS 100
- An automated system for carrying out a suitable and sufficient **priority assessment** of both real and suspected ACM's as required by HSG227
- **Automatic calculation** of the Total Risk Assessment Score as required by HSG227
- The preparation of a written record of the location of real and suspected ACM's in the form of an **Asbestos Register** which is prepared automatically from the data entered
- Providing system for storing and updating information regarding the **ongoing monitoring**, assessment or removal of ACM's
- The use of **pull down menus** and pre-formatted data sheets helps increase the efficiency of surveys
