

Fire Risk Assessor

Who is the software for?

The **Fire Risk Assessor** package has been specifically designed to assist Safety Advisors, Fire Engineers, property managers and others carry out Fire Risk Assessments as required by the **Regulatory Reform (Fire Safety) Order 2005**.

The **Fire Risk Assessor** software package has been specifically designed for those organisations with large property portfolios and those who carry out multiple fire risk assessments for many different clients. The package is therefore suitable for:

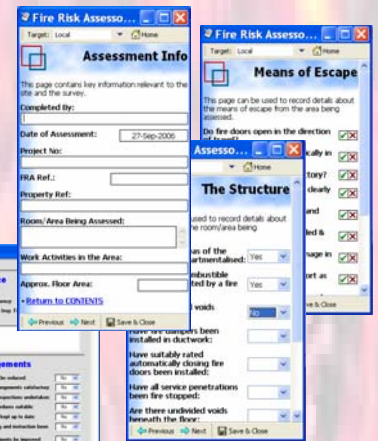

The package provides an electronic **Pocket PC** based **Fire Risk Assessment** solution that enables fire risk assessments to be completed in real time in a consistent and professional manner. Data can be collected quickly and efficiently by simply pointing and clicking on the screen of the Pocket PC, the data can then be downloaded to the desktop based database.

- Property Managers
